Better Data. Better Decisions. Better Schools.

Introduction

Educational Effectiveness Survey, Parent version 3.2.1

While there is no single solution for all schools, research on effective schools identified common characteristics of high-performing schools known as the 9 Characteristics. Successful schools that are engaged in improvement activities focus on these characteristics of “organizational and educator capacity” to create and improve the system(s) that ultimately drive performance outcomes.

Note

The Characteristics, “Focused Professional Development” and “Curriculum, Instruction, and Assessment” are professional activities conducted amongst the adult school community and are rarely viewed by parents. Thus questions regarding these Characteristics are not a part of the survey and does not appear in this report.

CEE’s primary concern is that this report be useful and informative in stimulating conversation. If you require any additional assistance in using your report, please contact us at info@effectiveness.org.

Capacity for Improvement

-  "Context" defines the "current reality" of the student population, the school, and community.
-  9 Characteristics, or organizational and educator capacity defines the strength and capacity of the adult culture to implement the changes and structures defined in the 7 Principles.
-  The 7 Principles define the structure and systems essential at the school-level in order to increase student outcomes and achievement.
-  The "Improvement Readiness" defines the current capacity for change amongst the systems and adult culture of the school and district.
-  All four components impact the ability of the organization (school) to increase student performance.

9 Characteristics of High-Performing Schools
